

Car accident action card.

Determine if there are any injuries Call 911 if there is.

If someone is injured and in the way of traffic, do not move them, position a car between them and the traffic even if this impedes traffic.

After dealing with injuries.

Move your car to the side of the road.

Make car cameras save footage

Put on high visibility vest. Put your car between you and the traffic. If you can not do this put on high visibility vest and put out flashers.

Information gathering check list

Start recording a video

Your phone can probably do this. You don't need to point it at anything just the audio of what people tell you is enough.

Exchange insurance information

- take a picture of their proof of insurance. You can usually take a picture while you are also making a video.
- if they don't have proof of insurance get their phone number and address, get a good picture of them on the video. See if you can get a picture of their registration. If they ask for your registration, phone number, address, or drivers license inform them they can get that through your insurance company.
- Write down. Drivers names.
- Write down passengers names if possible.
- Don't discuss responsibility or your policy coverage.

Take lots of pictures

- Do not walk into traffic to do so but get as many pictures as you can.
- the location, 360 video
- The vehicles, especially license plates and damage.
- Try to get passengers on camera.
- The vehicles vin number. Inside the windshield right in front of the driver. This is a good time to get a video of inside their car and any passengers in the car.
- Get phone numbers of whiteness's

Call Police

If there is any damage to vehicles or there are injuries the insurance company will need a police report. once you are in a safe place call your insurance company or use their app.

Remember The most important thing is to stay safe. If you don't feel safe stay in your car and call the police.
